

SHIFA IMRAN

AI / ML Engineer · Generative & Agentic AI · Software Engineer

0346-5001003 · shifaimran309@gmail.com · LinkedIn · github.com/shifa309 · Portfolio · Islamabad, Pakistan

PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building production Generative AI and Agentic AI systems across the finance, retail, and recruitment domains. Currently an Associate Software Engineer (AI) at Funavry Technologies, developing AI-augmented conversational flows and SOP chatbots using LangChain, LangGraph, and RAG pipelines. Previously delivered an AI-driven recruitment platform at Systems Limited built on Azure OpenAI, and full-stack web applications during a year-long internship at Walee. Skilled in LLM application development, prompt engineering, NLP, and deep learning, with working knowledge of the MERN stack and Microsoft Azure.

EDUCATION

Bachelors in Computer Science (BSCS)

2020 – 2024

National University of Sciences & Technology (NUST), Islamabad · CGPA: 3.76

- Final Year Project shortlisted in the top 3 for the Rector's Gold Medal in Computer Science; selected for the 10 Pearls FYP Accelerator Program.
- Awarded GPA-based Financial Assistance in Semesters 5, 6, and 7 for academic performance.

EXPERIENCE

Associate Software Engineer — AI | Funavry Technologies

Oct 2025 – Present

- Developed client-facing Generative AI chatbots — **Tamweel** (Aljazeera finance, bilingual Eng/Ar) and **Delmontie** (SOP assistant over documents and databases) — using LangChain and RAG.
- Built and maintain a module-agnostic API test-automation platform (React/TypeScript + FastAPI) for **Libbi**, an AI-powered productivity OS — reverse-engineering undocumented backend business rules from source into automated coverage.
- Engineered the platform's AI layer: an **LLM-as-judge** validator for subjective checks (structured JSON verdicts with reasoning), prompt-engineered failure diagnostics with a deterministic fallback, and an OpenAI-backed in-app assistant.

Associate Consultant — AI | Systems Limited

Sept 2024 – Dec 2024

- Delivered **Geni**, an end-to-end AI recruitment platform that automates JD creation, résumé screening, candidate evaluation, and interview assessment — streamlining the client's hiring workflow.

Software Development Intern | Walee

June 2023 – June 2024

- Built my Final Year Project, **Cre8iv**, during the internship — a social media content recommendation platform serving businesses and content creators across Instagram and Facebook.
- Contributed to full-stack software development and feature delivery across web applications, collaborating with the engineering team through the full development lifecycle.

KEY PROJECTS

Tamweel — Aljazeera Finance Chatbot · Funavry · LangChain, RAG, Prompt Engineering

Conversational AI pipeline pairing free-text natural-language understanding with a structured eligibility engine; implements per-turn language detection and response adaptation for English and Arabic.

Delmontie SOP Chatbot · Funavry · LangChain, SQL Agent, RAG, Vector DB

RAG + SQL-Agent architecture built on LangChain Self-Query Retrieval over a vector store, with metadata-aware routing that dispatches each query to document retrieval or a SQL agent.

Test Automation Platform — Libbi · Funavry · React, TypeScript, FastAPI, MongoDB, OpenAI

A visual, node-based platform for building API test workflows without scripting — auth chains, HTTP request steps, conditional routing, and response-validation checks composed as graph nodes and executed server-side, with each step checked against expected rules including persisted database state.

Geni — The Genius Behind Smart Hiring · Systems Limited · Azure OpenAI, FastAPI, Streamlit

Modular AI hiring pipeline on Azure OpenAI with FastAPI services, Blob Storage for artifacts, and a Streamlit interface — powering JD generation, résumé parsing and scoring, and interview evaluation.

Cre8iv — Social Media Content Recommendation System · Final Year Project · NUST × Walee · Python, Object Detection, Text Extraction, Prompt Engineering

An AI tool for Instagram and Facebook pages that runs object detection and text extraction on images and pulls page data (bio, existing posts), then applies prompt engineering to generate post captions — with built-in publishing and scheduling.

Social Media Brand Classifier · NUST · Python, NLP, Keyword Extraction

Collected Instagram data and applied NLP-based keyword extraction to classify brand type and page category.

TECHNICAL SKILLS

AI / Generative AI	Machine Learning, Deep Learning, Natural Language Processing (NLP), Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Chatbots, Prompt Engineering, AI Agents / Agentic AI
AI Frameworks	LangChain, LangGraph, OpenAI SDK, Azure OpenAI, Hugging Face
Backend Development	Python, FastAPI, REST APIs, API Integration
ML Libraries	Scikit-learn, TensorFlow, PyTorch, OpenCV
Databases	MySQL, MongoDB, ChromaDB, FAISS
Cloud & AI Services	Microsoft Azure, Azure OpenAI, Azure Blob Storage
Programming	Python, Node.js
Development Tools	Git, GitHub, VS Code, Postman, Figma, Canva

LEADERSHIP & EXTRA-CURRICULAR

Microsoft Learn Student Ambassador — Beta
Microsoft
Nov 2023 – Dec 2025

Marketing Lead
Notion Islamabad & MLSA Islamabad
Apr 2023 – Dec 2024

Deep Learning Fellow
ByteWise Limited
Mar 2023 – Jun 2023
